THE PURE PROJECT MANAGEMENT ADVANTAGE

Over the last 45 years, Hill's mission has been and remains to be the first choice for global program, project, and construction management.

We fulfill our mission by combining expert technical ability, collaborative partnerships, and an agile approach that enables our clients to deliver positive change around the world.

SETTING AN INDUSTRY STANDARD

We have built our company in the same way we deliver projects—by building trusted relationships and setting the industry standard for quality service.

Our focus as a business is “pure” project management, meaning we are free of any potential design or contracting conflicts. Our sole purpose is protecting our clients' interests, managing any potential risks, and delivering projects on-time and within budget.

Our exclusive focus on project management consistently exceeds our clients' definition of quality and helps them deliver positive change across the world, one project at a time.

CONCEPT TO COMPLETION SUPPORT

Our business model means we are truly dedicated to delivering success for our clients. Across our program, project, and construction management capabilities, from concept to completion, we have one definition of success: getting the best outcome for our clients.

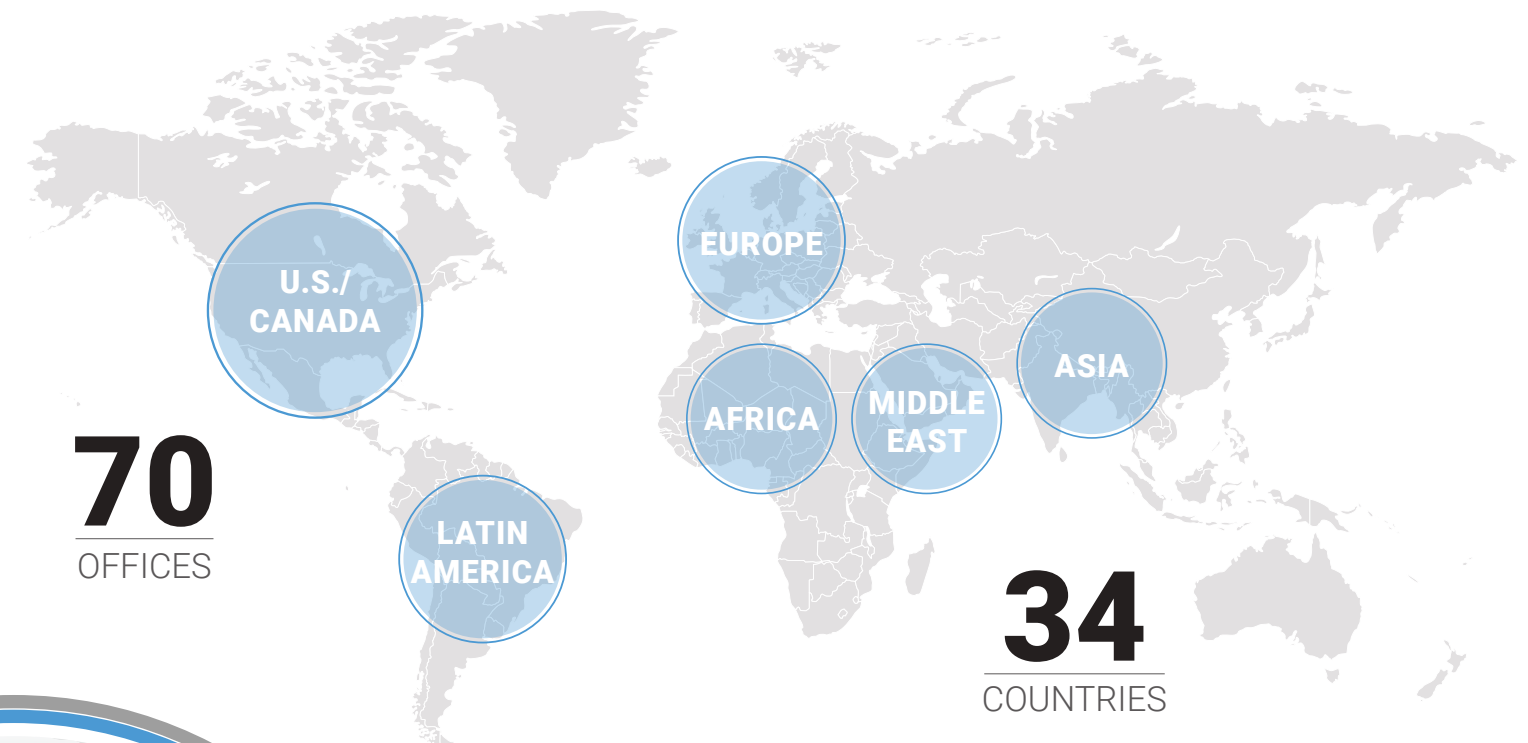

Regardless of where we begin to deliver a project, our focus is on the client's best interests. We learn your needs and priorities and drive them throughout the assignment. This is the value Hill can add to your project.

BUILDING ON 45 YEARS OF SUCCESS

Our internationally recognized team of program, project, and construction management experts have helped our clients deliver thousands of successful projects across the world for more than 45 years.

As our client, we build an end-to-end partnership with you. We are by your side through every stage of your project—from concept to completion. We are dedicated to ensuring your success and achieving your vision.

Together, we can build the future.

Construction Value
600+
BILLION

2,900
PROFESSIONALS

SERVICES: VALUE-DRIVEN, RESULTS-ORIENTED

Our services are founded in our values. Whether choosing Hill to craft the most cost-effective and efficient program processes or augmenting your team with our on-site inspectors and facilities managers, our clients know they can rely on Hill's expertise, innovation, commitment to safety, partnership, integrity, and inclusivity.

PROGRAM MANAGEMENT

Hill's comprehensive program management services help keep multiple, interrelated projects in sync, on-time, and within budget. We help owners, financial institutions, sureties, and others realize efficiencies, identify priorities, and reduce the uncertainty and risk in their capital programs. Hill's program managers review every detail of all projects, manage knowledge sharing, manage and control processes, and identify and resolve challenges.

ESTIMATING AND COST MANAGEMENT

Hill prepares cost estimates on projects ranging from thousands to billions of dollars. We collect vendor quotes, local material costs, and labor productivity rates from Hill's 45 years of experience, RS Means and Richardson estimating guides, U.S. Cost Success, and the U.S. Army Corps of Engineers' Micro Computer-Aided Cost Engineering System databases. Our estimates are among the most accurate and detailed in the industry, providing our clients with added cost confidence.

CONSTRUCTION MANAGEMENT

Successful construction management requires a proactive approach, managed by professionals who have the experience, skills, and technical expertise each project demands. Hill's construction managers are not only credentialed, they also have seasoned, hands-on experience in the construction industry.

PROJECT MANAGEMENT

Hill offers a complete solution to deliver projects on-time and within budget. Our project managers offer market sector expertise and global experience. Our focus is solely on the outcome of our clients' projects. Free of any design or contracting conflicts, we identify potential trouble spots on a project before they can impact progress and recommend ways to keep work moving forward as planned.

PROJECT MONITORING

Hill's project monitoring teams provide timely and objective reporting, from evaluating the performance of the construction manager, designer, and contractors, to monitoring schedules and analyzing costs. Teams include specialists in all phases of construction, so the myriad events that can occur on a project can be assessed and evaluated by the right expert at the right time. Our professionals then provide technically and financially sound recommendations compliant with all funding sources.

FACILITIES MANAGEMENT

For our Facilities Management (FM) assignments, we align the best models, processes, and procedures with the best resources and maintenance regime to make certain facilities and equipment function correctly, efficiently, and safely throughout their lifecycles. Hill offers a bespoke FM solution that begins at project kick-off, connecting with clients and building relationships with installation contractors, management teams, designers, and manufacturers to deliver buildings best suited to their mission for the long-term.

TROUBLED PROJECT TURNAROUND

While project management is most effective when implemented before construction begins, our PM support can also help clients regain control after problems have caused delays or overruns. To "turnaround" a project, Hill's teams design new schedules, create new plans, and implement procedures to get the project back on track and realize project goals.

PROJECT ADVISORY

Hill provides advisement services to banks, funds, governments, and multilateral institutions working in the construction sector. We provide objective and transparent advice on the largest and most complex projects around the world, assessing client prospects, structuring contracts, and monitoring project evolution. Our advisory services include lender and investor support, risk management, P3 structuring, management consulting, due diligence, cost consultancy, and project planning.

RESILIENCY AND DISASTER RECOVERY

Resiliency and Disaster Recovery programs and projects are unlike any other construction assignments. Community pressure to return to normalcy and reestablish schools, hospitals, and other basic services, along with population displacement, funding constraints, and a myriad of other factors, can compound the typical technical and managerial challenges of Resiliency and Disaster Recovery programs and projects. Hill's experience with and expertise in the nuances and opportunities involved in managing a portfolio of such projects can help address all these factors.

PLA CONSULTING

Hill helps public and private organizations with complex construction projects save time and money through a type of collective bargaining agreement called a Project Labor Agreement (PLA). PLAs create efficiencies by standardizing project participant contracts. They also help avoid conflict between contractors as well as strike conditions. Hill works with all parties on the project, including owners, contractors, and unions to unify their contractual relationship.

COMMISSIONING

Hill's approach to commissioning starts with developing a strong understanding of the owner's requirements, the design intent, the systems installed, and the project goals. Hill then develops a plan that integrates this understanding, commissioning communications, a complete outline of testing to be performed with the acceptance criteria, documentation required, and a training outline. The result is systems that function as specified, from start-up to the end of their lifecycle.

EXPERIENCE: GUIDED BY SUCCESS

BUILDINGS

“ The addition of Hill to the Phillip and Patricia Frost Museum of Science project has brought a wealth of experience and knowledge. The Hill team has truly taken ownership of the role, transformed the on-site dynamic, and exceeded our expectations. We have enjoyed working with Hill to deliver a new museum that will be an icon for the community and international destination. I would certainly recommend Hill as Project Managers/ Owner’s Representatives for projects of any size or scale.

- Frank Steslow
Chief Operating Officer

Phillip and Patricia Frost Museum of Science

ENVIRONMENTAL

“ I would like to express my appreciation on behalf of the City of Reading and its citizens to Hill International, Inc. for its superb work in executing the Project Management/ Construction Management Services (PM/ CM) contract in support of the Fritz Island Wastewater Treatment Plant Upgrades program.

- Carl Geffken
Interim Managing Director

ENERGY

“ Hill’s successful completion enables the US Capitol Power Plant to support new facilities such as the Capitol Visitor Center and reliably supply efficient cooling for the entire plant. It is quite an honor to have this recognition bestowed on this important project by professional members of the CMAA. This project is a great example of the progress we have made in institutionalizing industry’s leading practices in project management.

- Stephen T. Ayers, AIA
Architect of the Capitol

TRANSPORTATION

“ The Hill team brought to the [Bahrain International Airport Modernization Program] its wealth of experience, skills, and knowledge. The commitment and professionalism displayed by the entire team during the duration of the project are commendable.

- Abdullah Ahmed Mohammed
Vice President of Infrastructure
Development and Maintenance

INDUSTRIAL

“ Hill International’s project controls team on the K6 Program has performed exceedingly well. The K6 Program is currently under budget and on schedule.

- Ali Afghan
Genentech Program Director

BUILDINGS

Hill has managed the construction of some of the most complex buildings in the world. From the renovation of the U.S. Supreme Court to the reconstruction of the World Trade Center site in Manhattan to the United Nations Headquarters in Geneva, Hill understands each building project has its own unique requirements and challenges. Whether your project must address site constraints, stakeholder concerns, or mission critical IT systems, our professionals deploy the best practices and lessons learned to make certain your project proceeds as-planned and that you remain in-control of the work at all times.

Valley Metro Light Rail, Phoenix, AZ, U.S.

Foothill Gold Line Extension, Pasadena, CA, U.S.

TRANSPORTATION

Hill has been instrumental in the on-time delivery of some of the world's most groundbreaking transportation projects—projects that traverse region, mode, and market sector. We provide a range of services, from feasibility studies and project labor agreements, to construction management and project management oversight for rail lines, airports, roads, bridges, tunnels, and ports and marine facilities.

UWSGG Urban Services Improvement Investment Program, Various Locations, CA, U.S.

Sacramento Regional Wastewater Treatment Plant EchoWater Project, Elk Grove, CA, U.S.

ENVIRONMENTAL

Water supply systems, wastewater treatment plants, and hazardous waste remediations each create unique time, cost, and risk challenges. Hill has managed hundreds of projects that carry complex environmental considerations and challenges. Our project management, project management oversight, and technical support services have helped such clients as the U.S. Department of Energy and the New York Department of Sanitation meet those challenges.

ENERGY

The world's energy market presents both possibilities and challenges. The search for implementable renewable energy solutions often requires cutting-edge facilities capable of supporting new technologies, while capturing traditional energy resources involves increasingly strict environmental and regulatory compliance.

INDUSTRIAL

Industrial projects and the challenges they pose are as varied as their locations across the globe. Collectively, they are unlike projects in any other market sector and, as such, demand a unique and highly specific approach. Hill's professionals are working in mining, pharmaceutical, and technology facilities in industrialized and emerging countries around the world.

As our name suggests, Hill International is a truly global company. We have an intuitive understanding of how to succeed in every region we serve and have pioneered projects from Manhattan to Abu Dhabi.

Our international presence spans cities, countries, and continents. The Hill International team is situated in 72 offices spread across 36 countries. This global presence proves our ability to achieve the best outcome in any country or culture.

EXPERTISE: SKILLS, TALENT, AND INTEGRITY

Since our founding, our success has been driven by our global team of technical experts. We only look for the best and brightest to join our company. That's why our 2,800 strong team of industry experts has earned countless awards and global recognition for the excellent work they do. They are leaders in their fields who are committed to delivering success for our clients.

Our project teams are formed on a project-by-project basis, bringing the most appropriate skills and expertise to the assigned task. Hill's staff is comprised of experienced professionals in virtually every applicable discipline, including:

- Accountants/Auditors
- Architects
- Civil/Site Engineers
- Commissioning Engineers
- Construction Labor Attorneys
- Construction Managers
- Contract Administrators
- Cost Engineers
- Document Controllers
- Economists
- Environmental Specialists

- Facilities Managers
- Field Inspectors
- Financial Analysts
- Information Systems Engineers
- Management Consultants
- Mechanical and Electrical Engineers
- Process Engineers
- Program Managers
- Project Managers
- Quality Assurance/Quality Control Experts
- Quantity Surveyors
- Safety Experts
- Schedulers
- Structural Engineers
- Value Engineers
