

EYDAP, founded in 1980, is the leading company in the water supply, sewerage and wastewater treatment sector in Greece, covering the needs of more than 40% of the total population of the country, supplying Attica with drinking water, the quality of which is ranked among the best in Europe.

EYDAP is constantly investing in new technologies, as well as in new activities in and out of its competence area, currently focusing on the development of new WWTP and sewerage networks in East Attica, following the principles of circular economy.

In recent years, large companies' activities are oriented towards ESG objectives, related to environmental protection, society empowerment and corporate governance. In this context, EYDAP's goal is to achieve zero carbon water, high quality water accessible for every everyone, and high levels of transparency and disclosure.

EYDAP is the first public company to include in its Sustainable Development Report 2020, the SASB Standards for the water sector, while at the same time it has been included in the ESG index of the Athens Stock Exchange.
